Eduroam Guide

Northumbria University is setup to use eduroam. Eduroam allows you to connect to WiFi using your University/Institution Username and Password – making connections very similar to those you experience ‘back home’.

How to connect to eduroam

1. Select your wireless connection icon to see the wireless networks available
2. Select eduroam and click Connect
3. When connecting to eduroam you do not need a guest account. Enter the following:

<table>
<thead>
<tr>
<th>Northumbria Students</th>
<th>Visitors to Northumbria</th>
</tr>
</thead>
</table>
| a) Your Northumbria username in the format: username@northumbria.ac.uk  
  e.g. q991234@northumbria.ac.uk. |
| a) The username that you use to log on to your home institution in the format: username@university.ac.uk  
  e.g. user99@sussex.ac.uk |
| b) Your Northumbria password. | b) The password that you would use at your home institution. |

4. Mac users will be prompted to Accept Certificate at this point
5. You can now open your web browser and use the Internet.

Note for Visitors to Northumbria:

Before connecting to eduroam you may need to be registered for use at your home institution. You can check if you’re setup here. Please check your home website for specific details and remember to check the username format that your institution uses to connect to eduroam.

Help and Support

Find out more at the eduroam website. All users of eduroam must abide by the eduroam(UK) Policy as well as the local IT Policies of their home institution and those of the institution they are visiting. For information about Northumbria see Northumbria IT Regulations and Guidelines.
